Beverly, MA (Boston)

Google

Staff System Administrator (L6 SDE) 2024 - Present

- Head of Fitbit Corp IT, managing Vendor Team of 6.
- Program Manager for Boomi Integration Platform.

Senior System Administrator (L5 SDE) 2022 - 2024

- Access Operations role, delivering audit-cited, code-based IAM standards and patterns, including heuristic/ML process to handle org changes at Google scale. Protected MBD/PII.
- Supported team/service implementations across org.
- Served on a governance committee reviewing launches.

Systems Administrator (L4 SDE) 2021 - 2022

- Tech lead in Corp IT, advocating for business, user, compliance, security, and M&A integration goals.
- Maintained internal Chrome extension and access patterns to provide secure continuity services and auth scenarios.
- Configured load balanced SSO-enabled reverse proxied web and SSH tunnel interfaces for KBR (SAP, Atlassian, et al) enabling BeyondCorp access, Google IDP integrations.

Fitbit

Systems Administrator 2017 - 2021

- Operated on-prem Corp IT HCI (Cisco UCS) via VMware, cloud migrations (GCP, legacy AWS), Active Directory, and SAML SSO Identity. Managed 15+ SaaS and on-prem apps.
- Modernized endpoint and server management and monitoring. Established enterprise security practice, partnering with Infosec.
- Migrated Bitbucket IAM model from Jira/Stash to AD.

CDM Smith

Systems Administrator 2008 - 2017

- Deployed engineering software, configuration, OS upgrades and updates to 5000+ users, workstations.
- Architected and operated global software infrastructure - SCCM, Flexera, Bentley ProjectWise, NorthPlains, et al.
- Developed reporting for software/hardware lifecycle, utilization, and availability for business. Drastically improved overall licensing and hardware costs, optimizing for license compliance and cost.
